Jared:

Hi. HQ had sent a draft (provided below) and then Susan had asked my input for the draft (provided below). Can you review my draft in the email below and let me know today (if possible) what your thoughts are? Thanks.

Very Respectfully,  
Sandeep Mehta, P.E.

**Subject:** RE: DRAFT EMAIL\_Vogel Paint and Wax Co Superfund Site -- Follow-up to May 20th Call

**Draft for your consideration:**

This email is in follow-up to the conference call conducted on May 20th regarding the Vogel Pain and Wax Co, Maurice Iowa, Superfund Site:

Participants for this conference call with IDNR were Region 7 and EPA HQ – OSRTI.

The agenda included discussions on the path forward requirements of ROD or ESD in light of RP's proposal to implement Pilot Study to evaluate whether In-situ Bioremediation (ISB) and permeable reactive barriers (PRB) in the ground would impact and reduce the COCs in the groundwater plume. In addition, the RP also wanted to evaluate the path towards Site Deletion process.

BACKGROUND: Pilot Study Work Plan and North Work Plan: These work plans are currently in the process of implementation for a period of one year to evaluate ISB and PRB process impacts to the onsite COCs. The pilot study also includes implementation of issues and recommendations from the last five-year review report. The combination of these reasons support the path forward towards groundwater cleanup at the site, and possibly, a step forward towards site deletion process.

Future Direction Considerations:

**Subject:** FW: DRAFT EMAIL\_Vogel Paint and Wax Co Superfund Site -- Follow-up to May 20th Call  
**Importance:** High

Susan:

OSRTI has sent the draft email for R7 review. My thoughts on two of their comments is provided below.

Item 2: My current belief is, and that is what we say in ongoing FYR, that the last FYR recommendations have been incorporated into the current Pilot Study Work Plan and the North Work Plan. The data resulting from this work will assist in identifying the path forward for source remediation.

Item 3: See the note above.

Let me know your and Lynn's thoughts.

Very Respectfully,

Sandeep Mehta, P.E.
